Notes on the Plugin Index

Color Coding:

- New additions are highlighted with a green background.
- Filetypes have a blue background.
- Plugin Packs have a yellow background.
- Active plugins appear on a white background.
- Most other Statuses (Deprecated, Obsolete, Incompatible...,) are colored gray.

Type:

Effect - a plugin whose function can poll other pixels to modify the source pixel. These are found in the Effects menu or one of the submenus. The DLL files should be placed in the paint.net/Effects folder.

Adjustment - a filter type plugin. These effects can change the RGBA values of a pixel but cannot create new areas of color. Find these in the Adjustments menu. The DLL files should be placed in the paint.net/Effects folder.

Filetype - a new file format for loading and saving. These do not appear in the paint.net menus, instead they are added to the list of available filetypes in the load/save dialogs. The DLL files should be placed in the paint.net/Filetypes folder. Filetypes are color coded yellow.

External Resource - a completely separate application, program, or files designed to be used outside of the paint.net environment.

Plugin Pack - a grouping of individual plugins from a single author. Plugin Packs allow easier downloading of multiple plugins. Plugin Packs are color coded yellow.

Status:

Active - works with the latest release of paint.net or is still in active development.

Deprecated - **may still work, but a newer version of the plugin or a new technique/feature has largely replaced this plugin.**

Obsolete - either does not work with the latest release of paint.net, has been completely replaced or is unavailable for download. In other words don't attempt to download or use this plugin.

Unsupported - the author is no longer developing this plugin. It may still work, but don't bother crying if it doesn't.

Integrated - Plugin is now part of paint.net itself.

Bundled - Plugin is installed as part of the paint.net installation. The plugin remains separate from paint.net so it can be developed independently
